

Where the Conversion Leaks Are

example.com · CRO Recommendations · August 2026

The site's single most valuable conversion mechanism is the primary call-to-action, but it is currently a generic 'Learn more' that fails to communicate any specific value or outcome, and the absence of trust signals above the fold compounds the problem by leaving visitors with no reason to engage or confidence to convert.

#	Finding	Severity	Effort	PXL
1	Missing security headers 6 of 6 standard security headers are absent, which weakens protection against XSS, clickjacking and downgrade...	Medium	Medium	6/10
2	No trust signals present The page lacks any trust indicators such as reviews, guarantees, or security badges, undermining visitor...	High	Medium	5/10
3	Missing trust signals above the fold The homepage shows no sign of returns policy, guarantee, reviews, security badge, so a first-time visitor has...	High	Medium	5/10
4	No guarantee or return policy The absence of any guarantee or return policy leaves visitors uncertain about risk, hindering conversion.	Medium	Medium	5/10
5	No credibility or review evidence The page lacks third-party validation like reviews or ratings, reducing perceived credibility.	Medium	Medium	5/10
6	Weak page metadata Search and social previews are degraded: page title (absent), meta description, Open Graph tags are missing...	Medium	Medium	5/10
7	No responsive viewport declared Without a viewport meta tag, mobile browsers render the desktop layout scaled down, making every tap target...	Urgent	Medium	4/10
8	No value proposition stated The page copy fails to communicate what is being sold or why it is valuable, leaving visitors without a...	High	Low	4/10
9	Single generic call to action The only CTA 'Learn more' is vague and does not specify the action or outcome, reducing click-through intent.	Medium	Medium	3/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
